 **Stockists of Hills Science Diet**

Proud Sponsors

Every year the Animal Medical Centre fund raises for Assistance Dogs New Zealand. We are also proud sponsors of local assistance dog Mahe. Mahe and James are insperable and here is one example of that close bond. This was taken while James was in hospital for MRI's. Each month we'll be expanding on this amazing story.

Kittens Kittens Kittens

March 2016

Possibly one of the cutest subjects we can talk about, and also one with a really important message...

While we delighted to be caring for a family of kittens while we try to rehome them, its important to remember they came to us from a family who wanted one possibly two cats, but without de-sexing the Mum that wee family quickly became 5 cats, our friends and colleagues around the region are all facing a similar situation at the moment, but these little bubbas who have been entrusted to not only us but also other vet practices, Kitten Inn, the SPCA and the Cats Protection League really are the lucky ones, they are cared for and will find good homes, many will not.

We cannot stress enough how important it is TO DESEX YOUR PET!!

We are looking for responsible, loving lifetime companions for these little dudes, if you think that might be you, please get in touch, reception@animalmedicalcentre.co.nz, 4783880.

They will come:

- desexed
- wormed
- flea treated
- vaccinated
- microchipped and registered on the NZ Companion Animal Database fully vet checked
- with a FREE bag of superior nutrition Hill's Science Diet Kitten Healthy Development

That said!! If you or anyone you know ever finds themselves in a situation of having more kittens then they know what to do with, PLEASE bring them in to us or any other trusted animal welfare agency, even if they are left anonymously on our doorstep we would much rather this then many of the alternatives which seem to occur more often then we'd like to see.

Mike and Antoinette

Our cattery is open 365 days a year!
