

Cattery policy

Pick up and drop off times

Pickups past 9.30am in the morning will incur a half day charge for that given day.

Drop offs before 2pm incur a half day charge for that given day.

After-hours pick up and drop off

Pick ups and drop offs on Saturday afternoons, Sundays, and public holidays are available by prior arrangement. The time and date of after-hours pick up/drop off should be specified when booking. Facebook and/or text messages reminders can be organised if desired.

Parasite control

Animals must be flea'd and wormed prior to entry into the cattery.

Vaccination

Animals staying at the cattery must be up to date with their vaccinations. If they are due for their annual booster shot, we can arrange to administer this for you on arrival. If they have not been previously vaccinated, they will need to have had their vaccinations at least 10 days prior to entry into the cattery.

Feeding

By default, animals in the cattery will be fed Hill's Science Diet Optimal Care dry food twice a day. If you would like your cat to be fed their own specific brand or formulation, please bring this along with you when you drop them off.

Wet food can also be fed if this is part of your animal's regular diet. If this is the case, please specify on arrival.

Medication

If your animal is on medication, we are happy to administer this for you during their stay. Please ensure that you bring this with you in a clearly labelled bottle/packet, along with dosage instructions.
